

WORTH-A-SHOT

Did you know that 19% of unvaccinated people would like to get vaccinated but have financial barriers of **\$100** that prevent them from taking that step?

Mission:

Even though the Covid-19 vaccine is FREE, there are some financial barriers that some individuals can face if they were to get vaccinated. Worth-A-Shot is an apolitical, independent **nonprofit organization** seeking to remove those financial barriers. For example, some individuals lack transportation to and from appointments. Others are concerned that the potential side effects from the vaccine might mean they need to take a day or two off of work leading to lost wages. Still others are worried about childcare expenses for the appointments and possibly afterwards if side effects are experienced. As such, Worth-A-Shot reimburses newly vaccinated individuals with up to \$100 to offset these expenses.

Process:

Our application process is designed to take less than 10 minutes. After reading and agreeing to our one page of terms, applicants may then get vaccinated at the location of their choosing and then provide us a copy of their vaccination card and ID. Funds are then issued via Paypal or check. If applicants have medical questions, we advise them to consult with their medical doctor. While our organization is based in Cedar Falls, Iowa, we provide services to applicants **residing anywhere in the United States** (as long as their state or employer does not offer a similar program).

Next Step:

We would love to **partner** with you & your organization, whether that means sharing with your team or your market, making a donation or even volunteering time. Additionally, if you or someone you know want to become vaccinated but have financial barriers, message us to get started!
